How to Display LinkedIn Profile Data on Dynamics CRM Contact Form

```html
<html>
  <head>
    <script src="//ajax.googleapis.com/ajax/libs/jquery/1.4.3/jquery.min.js"></script>
    <script type=text/javascript src="https://platform.linkedin.com/in.js">
      // api_key: ************************
      </script>
    <meta charset=utf-8>
  </head>

  <body contenteditable=true style="background-color: rgb(246,248,250);" >
    <script type=text/jscript>
        try {
          // Retrieve the profile url form dynamics field
          var linkedprofilelink = window.parent.Xrm.Page.getAttribute("new_linkedinprofile").getValue();
            if (linkedprofilelink != null) {
              // Load the profile
            newmemberprofile(linkedprofilelink);
          }
        }
        catch (e) {
            alert(e.message);
        }
        function newmemberprofile(id) {
            // Create the script tag
            var $s = $('<script/>');
            // Assign the attributes
            $s.attr({
                    'type': 'IN/MemberProfile',
                    'data-id': id,
                    'data-related': 'false',
                    'data-format': 'inline',
                    'data-width': '350px'
            });
            // Inject the tag
            $('body').append($s);
        }
    </script>
  </body>
</html>
```
